MUTATION RESEARCH

International journal on mutagenesis, chromosome breakage and related subjects

INSTRUCTIONS TO AUTHORS

Types of paper *Mutation Research* contains 3 types of publication. (1) Papers reporting results of original fundamental research concerning mutagenesis, chromosome breakage and related subjects. (2) Review articles. (3) Short communications (to be published in the Section *Mutation Research Letters*).

General arrangement of papers Papers should be preferably in English, but may also be submitted in French or German. A summary (about 300 words) is mandatory for all (normal-length) articles. Papers in German or French should have a summary in English. The first paragraph of the article should summarize the research problem and the pertinent findings. The main text may be divided into sections such as Materials and methods, Experimental, Results, Discussion.

In papers mentioning chemicals, authors are requested to include *CAS registry numbers*. Registry numbers can be found by consulting Chemical Abstracts Ninth Collective Molecule Formula Index, by using Lockheed's computer access file named Chemline or by contacting the Chemical Abstracts Service, P.O. Box 3012, Columbus, Ohio 43210 (U.S.A.).

Keywords **A list of 3–6 words or short phases should be included on the first page of the manuscript. In the event that keywords are not supplied editorial discretion will be exercised in introducing appropriate words.**

Preparation of text (a) Manuscripts should be typewritten, double-spaced with wide margins, on one side of the paper only. Legends, footnotes—everything—must also be double-spaced. (b) The title page should include a footnote indicating the author to whom correspondence and proofs should be sent stating his full address, Tel. No. and Fax. (c) Line-drawn figures (including graphs) should be submitted in black ink on white paper and must be lettered ready for direct reproduction. Sharp photoprints of lettered line drawings may also be submitted. It is important that the drawings themselves AND the lettering are in proportion and large enough to allow for reduction before printing. Figures should be prepared suitably for either one column width (76 mm) or the entire page width (160 mm). The maximum height is 206 mm. The amount of reduction that will be made can be judged from the sizes of figures in recent issues of the journal. (d) Half-tone figures should be submitted as very sharp and contrasty glossy photoprints, separate from line drawings. (e) Legends for both line-drawn and half-tone figures should be typed on separate sheets. (f) Tables (also to be typed double-spaced) should be provided with headings. (g) Typescripts should be carefully checked before submission to obviate alterations after acceptance.

References The journal uses the Harvard system, in which names and dates are given in the body of the text and an alphabetical list of references at the end of the manuscript. References in the text should give the author's surname with the year of publication, e.g.: Smith (1980); Smith and Jones (1967a, 1979b); Baker et al. (1978). In the list of references, titles of journals should be abbreviated to conform with *Chemical Abstracts Bibliographic Guide for Authors and Editors 1974*. References to books should give details of chapter title, editors, title of the book, publishers and their location.

Examples:

Ehrenberg, L., and C.A. Wachtmeister (1977) Safety precautions in work with mutagenic and carcinogenic chemicals, in: B.J. Kilbey, M.S. Legator, W. Nichols and C. Ramel (Eds.), Handbook of Mutagenicity Test Procedures, Elsevier, Amsterdam, pp. 401–410.

Kastenbaum, M.A., and K.O. Bowman (1970) Tables for determining the statistical significance of mutation frequencies, Mutation Res., 9, 527–549.

Proofs Only printer's errors may be corrected: no changes in or additions to the edited manuscript will be accepted.
In case printers' proofs are returned by any courier service, they should be addressed as follows:
Mr. J.G. Corbet, Mutation Research, Elsevier Science Publishers, Molenwerf 1, 1014 AG Amsterdam (The Netherlands).
Telefax 31 20 5803 454.

Submission of a manuscript will be held to imply that it contains original work and that it has not been published or submitted for publication elsewhere. It also implies the transfer of the Copyright from the author to the publisher.

Contributions—in triplicate (one original plus two copies, and three sets of the originals of the illustrations)—may be sent to Prof. F.H. Sobels, Editor-in-Chief, *Mutation Research*, Department of Radiation Genetics and Chemical Mutagenesis, State University of Leiden, Sylvius Laboratories, Wassenaarseweg 72, P.O. Box 9503, 2300 RA Leiden (The Netherlands).

or to

Dr. M.D. Shelby, *Mutation Research*, NIEHS, P.O. Box 12233, Research Triangle Park, NC 27709 (U.S.A.).

Manuscripts in the field of Molecular Genetics may be submitted to
Prof. B.W. Glickman, *Mutation Research*, Biology Department and Centre for Environmental Health, University of Victoria, P.O. Box 1700, Victoria, B.C. V8W 2Y2 (Canada).

Manuscripts for publication in *DNA Repair* may be submitted to Professor Philip C. Hanawalt, Herrin Biology Laboratories, Stanford University, Stanford, CA 94305 (U.S.A.)

or to

Prof. Dr. P.H.M. Lohman, Department of Radiation Genetics and Chemical Mutagenesis, State University of Leiden, Sylvius Laboratories, Wassenaarseweg 72, P.O. Box 9503, 2300 RA Leiden (The Netherlands)

or to

Professor H. Takebe, Department of Experimental Radiology, Faculty of Medicine, Kyoto University, Kyoto 606 (Japan)

Manuscripts for publication in *Mutation Research Letters* may be submitted to
Dr. S.M. Galloway, Merck Sharp and Dohme Research Laboratories, W 44-1, West Point, PA 19486 (U.S.A.)
Dr. J.M. Gentile, Biology Department, Hope College, Holland, MI 49423 (U.S.A.)

Manuscripts for publication in *DNAging, Genetic Instability and Aging* may be submitted to
Richard B. Setlow, Biology Department, Brookhaven National Laboratory, Upton, Long Island, NY 11973 (U.S.A.).
Takashi Sugimura, National Cancer Center, 1–1, Tsukiji 5-chome, Chuo-ku, Tokyo 104 (Japan).
Jan Vijg, Ingeny B.V., P.O. Box 685, 2300 AR Leiden (The Netherlands)

Reprints 50 reprints of each article are sent to the author(s) free of charge. Additional reprints can be ordered by the author(s).

Advertising Advertising orders and enquiries can be sent to the Advertising Manager, Elsevier Science Publishers, Advertising Department, P.O. Box 211, 1000 AE Amsterdam (The Netherlands), Tel.: 20-515.3220; FAX: 20-683.3041, attn. Advertising Dept.; Great Britain: T.G. Scott and Son Ltd., Portland House, 21 Narborough Road, Cosby, Leicestershire LE9 5TA, Tel.: 0533-753.333; FAX: 0533-750.522, attn. Tim Blake; U.S.A. and Canada: Weston Media Associates, Daniel Lipner, P.O. Box 1110, Greens Farms, CT 06436-1110, Tel.: 203-261.2500; FAX: 203-261.0101.

No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior written permission of the Publisher, Elsevier Science Publishers B.V., Copyright and Permissions Department, P.O. Box 521, 1000 AM Amsterdam (The Netherlands).

This journal is printed on acid-free paper.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of the rapid advances in the medical sciences, the Publisher recommends that independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the Publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in Article 17, Paragraph 2 of the Dutch Copyright Act of 1912, and in the Royal Decree of June 20, 1974 (S. 351) pursuant to Article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970 (U.S.A.). If no code appears in an article the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the Publisher for such copying.

Master Keyword Index to Volumes 246–264

Abstracts, (252) 165
Acentric fragments, (253) 123
Acetaldehyde, (264) 103
2-Acetylaminofluorene, (252) 129, 247; (252) 259; (264) 109
Acetylaminofluorene, (253) 127
N-Acetylcysteine, (250) 87
Acetylsalicylic acid, (263) 83
O-Acetyltransferase, (259) 95; (262) 167
Acridine, (264) 231
Acridine and derivatives, (258) 123
Acridines, (262) 227
Acrolein, (248) 93; (260) 247
Acrolein derivatives, C^2-alkylated, (264) 193
Acrylamide, (250) 431; (259) 21; (262) 101
Activation, (263) 249
Activation of unused replication origins, (254) 79
Active oxygen scavengers, (254) 65
Active oxygen species, (251) 99
ad-3, (246) 193
ad-3 region, (246) 1; (246) 15; (253) 21
Ad-3 region, (250) 251
ad-3A locus, (246) 193; (253) 21
Ad-3A locus, (250) 251; (251) 41
ad-3B locus, (246) 193; (253) 21
Ad-3B locus, (250) 251; (251) 41
Ada protein, (250) 211
Adaptive response, (246) 179; (250) 211; (250) 299; (251) 133; (251) 181; (254) 45
Adduct formation, (259) 235
Adenine, (263) 93
Adenine adducts, (250) 145
Adenine phosphoribosyltransferase, (246) 151
Adenine phosphoribosyltransferase locus, (250) 365
Adhesion, (256) 221
Adrenocortical cells, (256) 105
Adriamycin, (247) 29
Adsorption, (260) 203; (262) 195
AFIGE, (263) 69
Aflatoxin, (249) 19; (261) 15
Aflatoxin B_1, (255) 67; (263) 137
Aflatoxins, (247) 77
Age, (256) 13
Age effect, (253) 199
Ageing, (256) 45; (256) 59; (256) 69; (256) 81; (256) 115; (256) 149; (256) 191; (256) 203; (256) 233; (256) 283; (256) 323
Aging, (250) 3; (250) 17; (256) 7; (256) 37; (260) 137
AHA: Gene mutation, (253) 63
AHH inducibility, (250) 103
Ah locus, (246) 129
Ah-non-responsive strain of mice, (251) 227
Ah-responsive strain of mice, (251) 227
AIA, Amino-imidazo-aza-arene, (260) 313
Airborne material, (263) 27
Airborne mutagens, (261) 75
Airborne nicotine, (261) 75
Airborne particulates, (259) 49
Air particulate, (261) 237
Air particulates, (246) 93
Air pollutants, (260) 195
Alcoholic beverages, (251) 115
Alcoholism, (263) 133
Aldehyde dehydrogenase inhibition, (264) 103
Aldehydes, (259) 363
Alkali-labile sites, (262) 79
Alkaline elution, (248) 35; (251) 1; (260) 55; (260) 115
Alkaline filter elution, (255) 49
Alkaline step elution, (264) 97
Alkylated DNA, repair, (255) 143
Alkylating agents, (250) 397; (254) 37
Alkylating agents, direct-acting, (262) 7
O^6-Alkylguanine–DNA alkyltransferase, (250) 397
N-Alkyl-*N*-nitrosourea, (250) 153
Alkyltransferases, (255) 143
Allele loss, (253) 73
Allelic complementation, (250) 251
Alpha particles, (250) 299
Alpha-peptide, (264) 25
Aluminium, (264) 135
Aluminium production plant workers, (260) 89
Alveolar macrophages, (262) 51
Alzheimer's disease, (256) 21; (264) 135
Ambient air, (249) 227
Ames assay, (249) 227; (251) 99; (261) 93
Ames/Salmonella assay, (259) 205
Ames Salmonella/microsome assay, (251) 227
Ames Salmonella test, (261) 21
Ames strains, (260) 25
Ames test, (251) 13; (252) 269; (260) 73; (260) 145; (260) 295; (260) 321; (261) 51; (261) 209; (262) 85; (262) 267
Ames testing, (259) 177
Amines, aromatic, (264) 155
Amino acids, (259) 219
9-Aminoacridine, (251) 233
1-Aminoanthracene, (249) 243
2-Aminoanthracene, (253) 127
Aminobenzamide, (254) 13

p-Aminobenzoic acid, (249) 119
1-Aminocyclopropanol, (264) 103
N^4-Aminocytidine, (253) 97
2-Amino-3,4-dimethylimidazo(4,5-*f*)quinoline, (251) 1
2-Aminofluorene, (249) 243
2-Amino-N^6-hydroxyadenine, (253) 1; (253) 21; (253) 47; (253) 55; (253); 83 (253) 91; (253) 97; (253) 103; (253) 109
2-Amino-6-*N*-hydroxyadenine, (253) 63
2-Amino-N^6-hydroxylaminopurine, (253) 5; (253) 33
Amino-imidazoazaarenes, (259) 205
2-Aminopurine, (251) 41; (253) 21
1-Aminopyrene, (249) 243
p-Aminosalicylic acid, (249) 119
Amitriptyline, (260) 99
Amosite, (261) 9
Analytical chemistry, (259) 205
Analytical methodology, (259) 325
Anaphase aberrations, (260) 369
Anchorage independence, (249) 71
Aneugenic activity, (264) 51
Aneugens, (252) 65
Aneuploidy, (246) 109; (248) 45; (248) 155; (252) 65; (259) 165; (261) 9; (261) 57; (261) 85; (263) 173; (263) 237; (263) 269
Aneuploidy in Drosophila, (259) 147
Aneuploidy induction, (260) 165
Aniline, (249) 243; (263) 115
o-Anisidine, (250) 115
Annual Meeting 1990, (252) 165
Anovlar 21, (260) 47
Anoxia, (262) 7
Antagonism, (263) 41
Anthracycline antibiotics, (260) 215
Antibiotic resistance, (264) 119
Antihelmintic, (264) 139
Antihistamine, (263) 127
Antileukemic therapy, (263) 243
Antimony, (264) 163
Antimutagen, (262) 25
Antimutagenic effect, (259) 79
Antimutagenicity, (246) 93; (249) 119; (251) 233; (261) 153; (262) 41; (262) 239
Antioxidant, (261) 15
Antioxidants, (250) 17; (250) 95; (263) 133
Antischistosomal drugs, (257) 49
Antitubulin immunofluorescence, (259) 67
Antitumoral agents, (261) 51
Antitumour drug, (264) 179
Anti-tumour initiation, (261) 153
Anti-tumour promotion, (261) 153
AP endonuclease, (254) 263
Aphidicolin, (250) 319; (255) 155; (262) 31
Apoptosis, (256) 233
Approach to definition, (248) 221
aprt, (250) 365
APRT locus, (261) 267; (261) 281
APRT sequence, (249) 169
Apurinic sites, (262) 79
Arabidopsis thaliana, (257) 19
1-β-D-Arabinofuranosylcytosine (ara C), (254) 231
1-β-D-Arabinofuranosylcytosine-detectable sites in DNA, (255) 57
Ara test, (251) 115
Aribinose-resistant, (262) 25
Aroclor 1254, (252) 45
Aroclor 1254 pretreatment, (247) 153
Aromatic amines, (259) 95; (263) 249
Aromatic DNA adducts, (260) 89
Arsenic, (250) 477
Arylamine activation, (247) 153
Arylamines, (260) 393
Aryl hydrocarbon hydroxylase (AHH), (251) 227
Asbestos, (261) 9
Ascorbic acid, (264) 119
L-Ascorbic acid (vitamin C), (251) 227
Aspartyl–tRNA synthetase gene, (264) 93
Assay evolution, (246) 313
Ataxia telangiectasia, (250) 337; (255) 11
Atherosclerosis, (256) 37
Audit materials, (253) 137; (253) 149
Autoradiographic assay, (249) 211
Autosomal dominant mutations, (258) 99
5-Azacytidine, (248) 101
Azathioprine, genotoxicity/carcinogenicity, (251) 157; (251) 163
3-Azido-1,2-propanediol, (251) 13
Aziridinylquinones, (261) 51

Backmutations, (246) 139
Bacteria, (261) 237; (263) 231
Bacterial conjugation, (255) 193
Bacterial fluctuation test, (262) 267
Bacterial metabolism, (264) 147
Bacterial mutagenicity, (260) 271
Bacterial transformation, (259) 235
Bacteriophage T4 *denV* gene, (254) 207
Bacteriophage T4 pyrimidine dimer–DNA glycosylase, (254) 207
BALB/c 3T3, (246) 279
Basal DNA damage, (256) 1
Base analog mutagens, (253) 47
Base damage, (251) 187
Base excision repair, (254) 263
Base-pairing, (253) 17
Base-pair substitution mutations, (253) 33
Battery of leukocyte tests (BLT), (252) 1
Benzene, (249) 201; (250) 457; (260) 219
Benzene amines, (246) 45
Benznidazole, (259) 139
Benzo[*a*]pyrene, (246) 129; (250) 87; (253) 127; (259) 251; (264) 109
Benzo[*a*]pyrene diol epoxide, (261) 267; (261) 281; (262) 79
Benzo[*a*]pyrene mutagenicity, (246) 159
Beryllium, (264) 163
Betel quid chewers, (261) 163
Bidi rollers, (261) 139
Bidi tobacco, processed, (261) 93

Bile acids, (262) 267
Biochemical aspects, (258) 3
BiodUTP, (254) 273
Biological activity, (259) 325
Biological consequences, (250) 223
Biological dosimetry, (259) 133
Biological response, (258) 191
Biologic markers, (248) 163
Biomarkers, (250) 17; (261) 225
Biotin, (254) 273
Biotransformation, (247) 283
1,3-Bis-(2-chloroethyl)-1-nitrosurea, (254) 55
Bladder carcinogenesis, (248) 261
Bladder carcinogens, (250) 115
Blastogenesis, mitogen-induced, (250) 467
Bleeding, (264) 109
Blenoxane, (257) 127
Bleomycin, (247) 175; (249) 161; (251) 241; (255) 11; (260) 265; (263) 33
Bleomycin, genotoxicity, (257) 127
Bleomycin hypersensitive cell, (263) 69
Blood lymphocytes, (260) 89; (261) 217
Blue light, (246) 187
Boldine, (260) 145
Bone marrow, (253) 123; (260) 47
Bone marrow erythrocytes, (250) 87; (250) 431
Bone-marrow MN assay, (263) 115
Bracken fern, (251) 91
BrdU, (251) 133
BrdUrd, (258) 161
Brewed coffee, (246) 169
5-Bromodeoxyuridine, (248) 101
Bromodeoxyuridine, (250) 411; (254) 143
5-Bromodeoxyuridine, (258) 161
5-Bromodeoxyuridine labeling, (262) 15
Bropirimine, (252) 221; (252) 229; (252) 239
Buccal mucosa cells, (261) 41
Bursa, (253) 161
Busulphan, (249) 285; (263) 237
1,3-Butadiene, (261) 117; (263) 47
Butyl methanesulphonate, (250) 411

Cadmium, (254) 45
Caenorhabditis elegans, (249) 37; (255) 163
Caffeine, (246) 103; (246) 123; (248) 195; (251) 71; (254) 79
Calcium chloride transformation, (255) 39
Calibration, mutagenicity assay, (253) 137; (253) 149
Caloric restriction, (250) 17
Calorie intake, (259) 351
Camptothecin, (255) 111
Cancer, (247) 231; (250) 3
Cancer-causing genes, segregation of, (247) 191
Cancer ecogenetics, (247) 283
Cancer, human, (247) 267
Cancer, human, predisposition to, (247) 199
Cancer, human, progression of, (247) 199
Cancer patients, (248) 93
Cancer, predisposition to, (247) 185
Cannabis, (261) 193
Carbon monoxide, (260) 9
Carboxyhemoglobin, (260) 9
Carcinogen-DNA adducts, (250) 87
Carcinogenesis, (248) 341; (256) 323; (259) 251
Carcinogenesis, environmental, (247) 259
Carcinogenesis, mechanism of, (259) 263
Carcinogenicity, (258) 285; (259) 277; (259) 291; (259) 325; (259) 363; (259) 399
Carcinogen metabolism, (250) 103
Carcinogens, (262) 109
Carcinogens, environmental, (260) 83
β-Carotene, (263) 41
CASE structure–activity relational method, (250) 25
Catalase, (251) 115; (255) 193
Catechol, (249) 201
Cell ageing, (256) 271
Cell cycle, (256) 271
Cell-cycle dependent mutation, (250) 411
Cell fusion, (256) 243
Cell immortality, (256) 69
Cell killing, (246) 151
Cell killing, non-random, (252) 1
Cell mortality, (256) 69
Cell proliferation, (256) 139; (256) 323; (263) 101
Cells, (256) 115
Cells, cultured, (260) 83
Cell surface change, (256) 169
Cell survival, (254) 37; (262) 219
Cell transformation, (246) 227; (246) 279; (248) 35
Cellular ageing, (256) 127; (256) 169; (256) 221; (256) 295; (256) 311; (256) 323
Cellular responsiveness, (256) 191
Cellular senescence, (256) 303
Cell walls, (260) 203
Cesium 137, (259) 133
CG sequences, (248) 115
Challenge assay, (260) 137
Charcoal broiled meat, (259) 251
Chemical modifications, (256) 255
Chemical treatment, (248) 51
Chemiluminescence, (251) 91
Chernobyl fallout, (262) 209
Chick, (256) 203
Chicken embryos, (253) 161
Chinese hamster cells, (264) 37
Chinese hamster lung cells, (249) 7
Chinese hamster mutant irs1, (254) 143
Chinese hamster ovary cell line, (254) 167
Chinese hamster ovary cells, (254) 161; (255) 183; (261) 267; (261) 281; (263) 47
Chinese hamster V79 cells, (249) 55
Chloramphenicol, (248) 145
Chloramphenicol genotoxicity assessment, (260) 65
Chlorinated furanone, (260) 55
Chlorinated furanones and halopropenals, (247) 97
Chlorinated hydrocarbons, (260) 39
2-Chlorobenzylidene malonitrile, (262) 263

1-(2-Chloroethyl)-3-(2-hydroxyethyl)-1-nitrosourea, (254) 55
Chloroethylnitrosourea, (260) 265
Chlorophenols, (260) 83
Chlorophyll, (250) 79
Chlorophyllin, (262) 25
CHO, (246) 255; (246) 295
CHO cell, (255) 175
CHO cells, (246) 221; (255) 257; (259) 1; (263) 231; (263) 237; (264) 183
CHO cells, induced mutants, (249) 135
5β-Cholanoic acids, (262) 267
Cholesterol, (262) 15
Chromate, (260) 19
Chromatid aberrations, (250) 325
Chromatid breaks, (250) 307; (253) 123
Chromatid deletions, (250) 299
Chromatin, (255) 67; (255) 247; (256) 81
Chromosomal aberration, (246) 31; (246) 221; (260) 19; (260) 73
Chromosomal aberrations, (248) 17; (248) 145; (248) 195; (251) 71; (259) 197; (260) 47; (260) 331; (261) 217; (262) 177; (263) 41; (263) 223
Chromosomal aberration scoring, (252) 157
Chromosomal aberration test, (262) 159
Chromosomal breakage syndrome, (247) 221
Chromosomal instability, (249) 223
Chromosome aberration, (246) 67; (246) 179; (246) 295; (247) 231; (250) 331; (252) 221; (259) 1; (261) 41; (262) 209; (263) 143; (263) 263; (263) 269
Chromosome aberrations, (248) 123; (250) 467; (250) 483; (251) 59; (251) 181; (251) 241; (253) 73; (256) 21; (257) 19; (260) 105; (260) 219; (260) 239; (260) 265; (260) 343; (260) 401; (260) 409; (261) 1; (262) 57; (262) 171; (263) 77; (263) 173; (264) 37
Chromosome aberrations in human lymphocytes, (262) 85
Chromosome aberration test, (264) 29
Chromosome breakage, (260) 137; (261) 57; (261) 193; (263) 203
Chromosome breaks, (253) 123
Chromosome counts, (246) 109
Chromosome damage, (247) 147
Chromosome loss, (250) 239
Chromosome malsegregation, (258) 237
Chromosome mutation, (264) 171
Chromosome rearrangement, (248) 115; (249) 37
Chromosomes, (256) 271; (262) 93
Chromosome transfer, (250) 337
Chrysotile, (261) 9
C3H10/T1/2, (246) 279
Cigarette smoke, (260) 9
Cigarette smoke condensate, (259) 29; (259) 67; (260) 9
Cigarette smoking, (248) 17; (248) 27; (260) 137; (261) 21
Cis-diamminedichloroplatinum, (254) 161
Cisplatin, (264) 225
Cisplatin resistance, (254) 89; (264) 59
Citrinin, (261) 209
c-*jun*, (256) 7
Classification according to chemical structure/mutagenicity, (257) 209, 229
Classification of carcinogens, (257) 91
Classroom experiment, (260) 25
Clastogen, (262) 159
Clastogenesis, (252) 221; (252) 229
Clastogenesis, radiation, (250) 319
Clastogenic activity, (264) 51
Clastogenic effects, (259) 139
Clastogenicity, (246) 123; (253) 63; (260) 215; (261) 15; (262) 159
Clastogenicity in vitro, (263) 83
Cloning, (262) 183
Cloning efficiency, (253) 199
Cloning repair genes, (247) 213

UPDATE YOUR LABORATORY METHODS

LABORATORY TECHNIQUES in biochemistry and molecular biology

Series Editors: **P.C. van der VLIET**, *Utrecht, The Netherlands, and* **A.J. LEVINE**, *Princeton, NJ, U.S.A.*
Previous Editors: **T.S. Work, E. Work, R.H. Burdon,** *and* **P.H. van Knippenberg**

The books in this famous series cover all aspects of laboratory work in biochemistry and molecular biology. Each book in the Lab. Techniques series provides a clear, concise, and easy-to-follow layout and style - ideal as a reference source.

Monoclonal Antibody and Immunosensor Technology :

The production and characterization of rodent and human hybridomas

Volume 23, by **A.M. Campbell**

1991 416 pages. Price: US $156.50 / Dfl. 305.00 ISBN 0-444-81413-2
Paperback: US $ 65.00 / Dfl. 115.00 ISBN 0-444-81412-4

This highly practical book, and successor to Volume 13 in the Lab. Techniques series, explores further and provides more comprehensive, authoritative information on the production of Mabs. Much new and illuminating material has been included covering the concepts behind the application of recombinant DNA technology and biosensor technology to monoclonal antibodies, and all the human Mab technology facilitated by PCR of antibody genes. Also included in this latest volume is a section focussing on other methods of obtaining B cell clones such as short-term culture and oncogene transformation and an interesting section on Mab patents.

Isolated Hepatocytes:

Preparation, Properties and Applications

Volume 21

by **M.N. Berry, G.J. Barritt** *and* **A.M. Edwards**

1991 510 pages Price: US $ 183.00 / Dfl. 320.00
ISBN 0-444-81302-0
Paperback: US $ 71.50 / Dfl. 125.00 ISBN 0-444-81299-7

This book sets out clearly and effectively the preparation and working methods of laboratory techniques involving isolated hepatocytes and will make life easier for every laboratory worker concerned with these techniques.

An Introduction to Radioimmunoassay and Related Techniques , 4th Revised Edition

Volume 6, by **T. Chard**

1990 xvi + 290 pages Price: US $ 154.50 / Dfl. 270.00
ISBN 0-444-81146-X
Paperback: US $ 42.50 (USA & Can.) / Dfl. 89.00 ISBN 0-444-81145-1

Methods of Cell Separation

Volume 18

by **P.T. Sharpe**

1988 240 pages. Price: US $ 135.50 / Dfl. 237.00 ISBN 0-444-80930-9
Paperback: US $39.50 (USA & Can.)/ Dfl. 84.00 ISBN 0-444-80927-9

Techniques in Free Radical Research

Volume 22, by **C.A. Rice-Evans, A.T. Diplock** *and* **M.C.R. Symons**

1991 290 pages. Price: US $ 145.75 / Dfl. 255.00 ISBN 0-444-81304-7
Paperback: US $ 48.75 (USA & Can.) / Dfl. 95.00 ISBN 0-444-81314-4

Free radical species are generally short-lived due to their high reactivity and thus direct measurement and identification are often impossible. ESR is the only technique which has the potential for direct detection of radicals but in biological systems even these must be trapped by a spin-trapping agent. Thus most investigations involve recognition of indicators of the presence of radicals in vivo or "FOOTPRINTS" of radical-mediated damage.
Techniques in Free Radical Research assembles and critically assesses the most relevant and reliable experimental approaches used towards the measurement of radicals and radical-mediated damage in chemical systems, in cells and in tissues.

Immobilized pH Gradients: Theory and Methodology

Volume 20, by **P.G. Righetti**

1990 408 pages Price: US $ 170.50 / Dfl. 298.00
ISBN 0-444-81301-2
Paperback: US $ 46.75 (USA & Can.) / Dfl. 91.00 ISBN 0-444-81315-2

This book brings the reader recent developments in this field. The book contains information on: detailed treatment of all the chemistry of the Immobiline chemicals; theory of pH gradient generation; all analytical aspects of IPGs; two-dimensional maps; preparative aspects of IPGs; some examples of applications, including genetic and forensic analysis, blood polymorphism etc. The book is a worthy asset to the **Lab. Techniques** series.

Cell Culture for Biochemists, 2nd Revised Edition

Volume 8, by **R.L.P. Adams**

1990 374 pages Price: US $ 160.00 / Dfl. 280.00
ISBN 0-444-81306-3
Paperback: US $ 49.75 (USA & Can.) / Dfl. 80.00 ISBN 0-444-81297-0

Synthetic Polypeptides as Antigens

Volume 19

by **M.H.V. van Regenmortel, J.P. Briand, S. Muller** *and* **S. Plaue**

1988 350 pages. Price: US $ 111.50 / Dfl. 205.00 ISBN 0-444-80975-9
Paperback: US $38.50 (USA & Can.)/ Dfl. 73.00 ISBN 0-444-80974-0

FORTHCOMING TITLES:

Dry Chemistry (*O. Sonntag*)

Nucleic Acid Hybridization (*P. Tijssen*)

MUTATION RESEARCH - Special Issues

International journal on mutagenesis, chromosome breakage and related subjects

Editor-in-Chief for all sections **F.H. Sobels**, *Leiden, The Netherlands*

Specific topics which are worthy of independent publication are produced as Special Issues, which form milestones in the development of the journal. As part of the subscription, these special issues are automatically available to subscribers, but are also available separately to non-subscribers.

1989:

❑ Genetic Risk: Basis and Consequences
Proceedings of a Symposium, GSF, Neuherberg, Germany, 15 September 1988 on the Occasion of the 60th Birthday of Dr. Udo H. Ehling
Vol. 212, no. 1 *edited by* **I.-D. Adler** vi + 102 p.
1989 Price: Dfl. 95.00

❑ Developments in Genetic Toxicology
Vol. 213, no. 1 *edited by* **F.E. Würgler** vi + 104 p.
1989 Price: Dfl. 95.00

❑ Effects of Active Oxygen Species on the Genetic Apparatus
Vol. 214, no. 1 *edited by* **D. Anderson** *and* **B.J. Philips** vi + 164 p.
1989 Price: Dfl. 125.00

❑ Use of Shuttle Vectors for the Analysis of DNA Damage Processing in Mammalian Cells
Vol. 220, no. 2/3 *edited by* **A. Sarasin** iv + 232 p.
1989 Price: Dfl. 125.00

❑ Structure-Activity Relationships in Chemical Mutagenesis
Vol. 221, no. 3 *edited by* **M.M. Shahin** iv + 126 p.
1989 Price: Dfl. 95.00

❑ Environmental Tobacco Smoke and Passive Smoking
Vol. 222, no. 2 *edited by* **M. Sorsa** *and* **G. Löfroth** iv + 70 p.
1989 Price: Dfl. 75.00

❑ Assessment of the Genotoxicity in vivo of the Rodent Non-Carcinogens Caprolactam (CAP) and Benzoin (ZOIN)
Vol. 224, no. 3 *edited by* **J. Ashby** *and* **M.D. Shelby** iv + 86 p.
1989 Price: Dfl. 95.00

1990:

❑ Male-Mediated F_1 Abnormalities
Vol. 229, no. 2 *edited by* **D. Anderson** iv + 148 p.
1990 Price: Dfl. 95.00

❑ Molecular Dosimetry and Analysis of Mutations for Estimation of Genetic Risk
Vol. 231, no. 1 *edited by* **W.R. Lee** vi + 108 p.
1990 Price: Dfl. 156.00

❑ Mutagenesis Studies in Latin America
Papers Presented at a Symposium on Genetic Monitoring for Protection of Human Health and the Environment, San Jose, Costa Rica, March 1988
Vol. 232, no. 1 *edited by* **P. Ostrosky** *and* **M.D Shelby** vi + 106 p.
1990 Price: Dfl. 136.00

❑ Alkylation, Mutagenesis and Repair
Vol. 233
edited by **B. Singer** vi + 290 p. 1990 Price: Dfl. 278.00

❑ Serial Versus Single Dosing Protocols for the Rodent Bone-Marrow Micronucleus Assay
Vol. 234, no. 3/4
edited by **H. Tinwell** iv + 152 p. 1990 Price: Dfl. 104.00

❑ The Enzymology of DNA Repair
Vol. 236, no. 2/3
edited by **E.C. Friedberg** iv + 170 p.
1990 Price: Dfl. 105.00

❑ Cancerogenic Risk by Endogenous Factors and Processes
Vol. 238, no. 3 *edited by* **H.W. Rüdiger** iv + 160 p.
1990 Price: Dfl. 95.00

❑ The Possible Involvement of Somatic Mutations in the Development of Atherosclerotic Plaques
Report of ICPEMC Subcommittee 7/1
Vol. 239, no. 3 *edited by* **B.A. Bridges**, **D.E. Bowyer**, **E.S. Hansen**, **A. Penn** *and* **K. Wakabayashi** vi + 48 p.
1990 Price: Dfl. 104.00

1991:

❑ Recommended Protocols Based on a Survey of Current Practice in Genotoxicity Testing Laboratories
Vol. 246, no. 2 *edited by* **E.R. Nestmann** iv + 108 p.
1991 Price: Dfl. 128.35

❑ Genetic Susceptibility to Cancer
Vol. 247, no. 2 *edited by* **A.D. Bloom** *and* **D.A. Deres** iv + 114 p.
1991 Price: Dfl. 128.35

❑ Early Indicators of Non–Genotoxic Carcinogenesis
Proc. Joint ECETOC/IPCS Workshop, Brussels, Belgium, 1990
Vol. 248, no. 2
edited by **B. Hildebrand**, **J. Ashby**, **P. Grasso**, **M. Sharratt**, **W.J. Bontinck** *and* **E. Smith** ii + 166 p.
1991 Price: Dfl. 128.35

❑ Mammalian Germ-cell Mutagenesis
Vol. 249, no. 2 *edited by* **L.B. Russell**
1991 Price: Dfl. 128.35 88 pages

❑ 2-Amino-N^6-hydroxyadenine
Vol. 253, no. 1 *edited by* **F.J. de Serres** *and* **D.G. Hoel**
1991 Price: Dfl. 100.35 114 pages

❑ The U.S. National Toxicology Program Carcinogen Database
Vol. 257, no. 3 *edited by* **F.H. Sobels** *and* **J. Ashby** iv + 108 p.
1991 Price: Dfl. 100.35

❑ Ionizing Radiation and Genetic Risks
Vol. 258, no. 1 *edited by* **K. Sankaranarayanan** vi + 122 p.
1991 Price: Dfl. 100.35

❑ Potential Carcinogens in the Diet
Vol. 259, no. 3/4 *edited by* **H.-U. Aeschbacher** iv + 208 p.
1991 Price: Dfl. 150.50

❑ **JUBILEE VOLUME**
Vol. 250
1991 Price: Dfl. 301.00 505 pages

MUTATION RESEARCH

Publication schedule for 1992

Mutation Research is published according to a volume-numbering scheme that embraces all sections of the journal, in addition each section has its own colour code.

MUT (green), Fundamental and Molecular Aspects of Mutagenesis; MUTENV (blue), Environmental Mutagenesis and Related Subjects including Methodology; MUTDNA (brown), DNA Repair; MUTAGI (red), DNAging: Genetic Instability and Aging; MUTREV (purple), Reviews in Genetic Toxicology; MUTGEN (pink), Genetic Toxicology Testing and Biomonitoring of Environmental or Occupational Exposure; MUTLET (yellow), Mutation Research Letters.

1992	MUT	MUTENV	MUTDNA	MUTAGI	MUTREV	MUTGEN	MUTLET
Jan.	265/1		273/1	275/1	276/1	278/1	281/1
